WORK EXPERIENCE

ESDP Computer Scientist **NAWCWD** **Oct 2023-Aug 2026**

Rotational engineering program across software development, digital engineering, and systems testing.

Software Test Automation Engineer — VECTR DIEEE | Oct 2025 – Aug 2026

- Developed UI functionality for the Database Front-End Project using Dart and Flutter.
- Developed JavaScript-based automated tests in TestComplete to expand software validation and regression testing coverage.

Data & Systems Analyst — Digital Engineering | May 2025 – Oct 2025

- Implemented Power Automate workflows to automate data collection, processing, and reporting.
- Processed and visualized training data to evaluate course effectiveness and communicate findings to stakeholders to support data-driven decision making.

Software Developer — IFL SoSTE | Nov 2024 – May 2025

- Developed C++ features for a test-case automation tool to expand system-of-systems testing.
- Created MATLAB scripts to automate processing and analysis of simulation results.
- Designed architecture to integrate a black-box system into the testing framework.

Systems Test Engineer — DPSS DIEEE | Jan 2024 – Nov 2024

- Designed and documented an automation infrastructure pipeline to support system-level testing.
- Integrated software controls with JavaScript automation scripts for automated test workflows.
- Validated software implementations and collaborated with systems engineers and developers to identify and resolve discrepancies to ensure software quality.

Research Assistant **California State University, Fresno** **Oct 2022-Dec 2022**

- Developed MATLAB image-processing functions to identify salient regions of paintings.
- Tested a VR application by evaluating gameplay mechanics, identifying software issues, and documenting findings to support development improvements.

PROJECTS

Valorant Callouts | UI Designer — Interactive map website (Next.js, Krita)

Bulldogs Finder | Frontend Developer — Roommate-finding app (Figma, XModule)

Omega Calendar | Frontend Developer — Calendar app (Kotlin)

EDUCATION

California State University, Fresno

Aug 2020-May 2023

B.S. in Computer Science, Minor in Mathematics

GPA 3.68/4.00

SKILLS

Languages: C++, C#, Python, JavaScript, Dart, Kotlin, MATLAB, SysML

Frameworks & Libraries: React, Next.js, Flutter, Unity, OpenGL, Isar (NoSQL)

Tools & Platforms: Git, Jira, Android Studio, TestComplete, Microsoft Power Platform, Blender
